SUMMARY

Product designer who spent a decade founding and running creative projects in multiple fields before moving into product design. I own things end to end, from research to shipped work, grounded in data instead of guesses. I treat AI as a real collaborator: I created an agent that explains, questions and pushes back on each decision, with me approving every step. At Cyvore, my redesign and investor materials directly helped close their first funding round.

EXPERIENCE

Freelance Product Designer, Cyvore *Sep 2025 – Present*

- Diagnosed key usability issues on cyvore.com and shaped a redesign strategy from market research.
- Presented findings to Cyvore's co-founders, earning the contract to execute the redesign.
- Delivered investor presentations that helped close Cyvore's funding round.
- Rebuilt the site's information architecture with AI tools, making it 4× faster to navigate.

Freelance Product Designer, Nordic Logic *Aug 2026 – Present*

- Led the launch as sole designer for a one-person freight-audit startup, live in three weeks.
- Designed and rebuilt the B2B client dashboard, the real product behind the marketing site.
- Caught a wrong pricing claim through competitor analysis and rebuilt the plan around verified numbers.
- Created an AI agent that explained, questioned and pushed back on each decision, with me approving every step.

Founder & Product Designer, Eventread *Mar 2026 – Jun 2026*

- Identified a gap in the live events market and shipped a pre-booking intelligence SaaS in under 4 months.
- Integrated Ticketmaster and Live Events Search APIs into a Next.js app deployed on Vercel.
- Modeled event-impact risk across industries and cities to flag conflicts for each user's show.

Founder & Creative Director, 2 Independent Music Projects *2016 – 2024*

- Founded two independent music projects, leading brand, design, video and release marketing over 8 years.
- Managed a network of collaborators, venues and industry partners across bookings, budgets and live shows.

PROJECTS

Pulse — UX Case Study, CareerFoundry *Dec 2025 – Feb 2026*

Designed a mobile fitness app end to end to explore retention through habit-formation instead of streak pressure.

- Designed a goal-based onboarding flow validated through 2 rounds of usability testing.
- Built a from-scratch design system to keep every screen visually and functionally consistent.
